About This Game

In Nanoswarm, you take the role of a tank commander briefed with a new mission from command to enter the storage facility and put an end to the nanobot threat before it ever begins. With the aid of some of the most powerful weapons technology has to offer, you must fight your way through the storage facility and take down the nanobot central brain, deep within the heart of the facility. It won't be easy, as you will be under constant surveillance from the central brain, which will be sending any and all available resources at you at all times. You must fight your way through the levels, room by room, until you reach and destroy the central brain. In true roguelite fashion, death means death, so if you fail, you will be sent back to the beginning of the first level, so be careful!

Nanoswarm is a hardcore super roguelite, designed to be very difficult. There's a survival mode that lets you keep track of your skill progression as you practice. The story, (roguelite), mode is where the real difficulty lies. You have to work through five levels with ever-increasing difficulty, without dying even once. Once you die, you're taking back to the menu screen. If you like uber-hard challenges Nanoswarm is the game for you! If not, well, there's no harm in trying, right?

Title: Nanoswarm
Genre: Action, Casual, Indie, Strategy
Developer:
Termite Farm
Publisher:
Termite Farm
Release Date: 5 Feb, 2019

b4d347fde0

English

5:Days Traveled

Crew: 4 of 4

MARS 2030

3193580:Miles from Earth
Excellent:Ship Status
Excellent:Crew Status

\u2610 Few Bugs

\u2610 No bugs that is destroying the fun

\u2611 Nothing. it's an alright game, can get a little repetitive and boring though 6/10. Really wonderful! The artist thought of just about every part of a city you can imagine. I made a diner using kitchen tiles and a combination of bedroom/living room tiles, and it looks great. The best part is that there are "clean" (not sloppy, not bloody) versions of everything, so this can double as a modern city tileset. Definitely worth the money.. How do we use them?

This game is awesome. I bought it after reading other reviews and I was not disappointed. This game is true to the screenshots and videos. The world and ambiance are both beautifully crafted, the music matches the feel of the game so perfectly. The combat is varied, shooting, grenades, grenade launcher, deflecting projectiles, smashing crystals. This game looks remarkably polished, I didn't experience any bugs, visual or audio glitches. Would have payed \$20 for this game.

Would love to see a better way to deal with multiple incoming projectiles, perhaps a shield or shotgun type weapon.

Fantastic game overall, highly recommend!. A bit repetitive.... Weird flex but ok and also this game has a good story too.

i've already spent literally hundreds of hours playing this on the vita and i still have yet to get the last 2 trophies to platinum it lol (no thanks to lesser time to even play my trusty handheld due to busy schedules) but i had to do this coz i bought it PC version (steam) :/. Kinda nice feature, But it would be better if the mods were on the Steam Workshop.. Played some of the game tonight and it's so cute! I like the graphics and even though I'm not big on tower defense games, this one is fun. I like how you have to upgrade your town and hire people to kill things and make money for you. I've only done a couple islands so far but I'm looking forward to playing more of them.. Not as good as the first game but it does the job. It is very relaxing to play through as a break between Rocket League and Dark Souls.
